INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/32296

| | No. II | and a set has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: |
|----------|-------------|--|
| Inis | internation | onal search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: |
| 1. | | Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: |
| 2. | | Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: |
| 3. | 6.4(a). | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule |
| Box | No. III | Observations where unity of invention is lacking (Continuation of item 3 of first sheet) |
| | | |
| | | |
| 1. | | As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. |
| 1. 2. | | searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite |
| | | searchable claims. |
| 3. | | searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report |
| 3. | | searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: |
| 3. | mark on | As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: |

Form PCT/ISA/210 (continuation of first sheet(2)) (January 2004)

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group 1, claims 1-3 pertain to a real-time video decoder for a mobile device, classified in class 375/240.25.

Group 2, claim 4 pertains to a method of synchronization of audio and video data, classified in class 375/240.28; 348/515.

Group 3, claims 5-11 pertain to methods of reducing complexities of MPEG4 decoding, classifified in class 375/240.27, 240.29.

Group 4, claims 12-16 pertain to a method of fast YUV to "RGB555" conversion, classified in class 348/453.

Group 5, claims 17-18 pertain to a method of compression B-frames, classified in class 375/240.15.

Group 6, claims 19-22 pertains to a method of fast fixed point implementation of an MPEG-1 Layer 3 decoding, classified in class 704/500.

Group 7, claims 23-26 pertain to a method for computational speedup of inverse modified discreet cosine transform, classified in class 375/240.2.

Group 8, claim 27 pertains to a method for computational speedup of final windowing in audio/visual (AV) decoder, classified in class 348/596.

Group 9, claims 28-31 pertain to a multimedia file format for compression/decompression facility classified in class 348/729.

Group 10, claims 32-33 pertain to a multimedia encryption method classified in class/380/239.
